NMFS-SEA-02-11
FOR IMMEDIATE RELEASE
September 10, 2002

EMERGENCY RULE IMPLEMENTED IN PACIFIC COAST GROUND FISH FISHERY AND TRIP LIMIT ADJUSTMENTS OFF WASHINGTON, OREGON, AND CALIFORNIA

EFFECTIVE SEPTEMBER 10, 2002

Adjustments to trip limits for groundfish taken off Washington, Oregon, and California are announced by the National Marine Fisheries Service (NMFS). These changes are **effective September 10, 2002**, unless otherwise specified and are intended to protect overfished and depleted stocks. Trip limit changes that are effective September 10, 2002, for the trawl "A" platoon and are effective September 15, 2002, for the "B" platoon. The "B" platoon can fish July - August limits until September 15, 2002, in areas that are open following implementation of this rulemaking.

NMFS is implementing an emergency rule to establish new depth-based management measures in the Pacific Coast groundfish fishery for September - December 2002 in order to allow the harvest of healthy groundfish stocks while protecting darkblotched rockfish. In response to higher than expected landings of darkblotched rockfish, an overfished species, during the first few months of 2002, the limited entry trawl fishery north of 40° 10' N. latitude closed on September 1, 2002. At its June 17 - 21, 2002, meeting in Foster City, California, the Pacific Fishery Management Council (Council) felt the economic need to keep the limited entry trawl fishery open during September was great and requested that NMFS establish new depth-based management measures via emergency rulemaking. This emergency rule establishes a darkblotched rockfish conservation area (DBCA) extending from the U.S./Canada border to 40° 10' N. latitude and between approximately 100 fathoms and 250 fathoms. This emergency rule maintains the closure to trawling with groundfish gear where darkblotched rockfish are commonly found, but allows limited entry trawl access to healthy deepwater groundfish (seaward of 250 fathoms) and nearshore groundfish (shoreward of 100 fathoms) stocks outside of the DBCA.

Following the Council's June meeting, NMFS drafted an Environmental Assessment/Regulatory Impact Review to evaluate the effects of this emergency rule. With that analysis, NMFS estimated the total catch of darkblotched rockfish associated with the Council's September implementation request to be approximately 96% - 99% of the OY. This is due, in part, to the estimated bycatch of darkblotched rockfish that would be caught shoreward of 100 fathoms with nearshore flatfish during September and October. Given the uncertainties in estimating the catch of darkblotched rockfish, particularly shoreward of 100 fathoms, NMFS believes a more conservative action than that proposed by the Council is

necessary to assure the darkblotched rockfish OY is not exceeded. Therefore, NMFS will continue to prohibit limited entry trawl fishing shoreward of the DBCA during September, but re-open that area during October - December with reduced flatfish trip limits during October. Limited entry trawl access seaward of the DBCA will be re-opened for September - December. This modification of the Council's request is expected to reduce the incidental catch of darkblotched rockfish with nearshore flatfish during the months of September and October and provide greater assurance that neither the darkblotched rockfish OY, nor the OY of any other groundfish species will be exceeded.

NMFS also determined that some of the flatfish limits recommended by the Council for the September - December periods were too liberal to adequately prevent the overharvest of overfished species. With this emergency rule, NMFS sets trip limits for groundfish, including flatfish, at levels that are expected to protect overfished species from overharvest. In addition, NMFS is correcting limited entry fixed gear and open access limits for Pacific whiting during the September - December periods to reflect the closure of Pacific whiting announced in the July inseason action (67 FR 44778, July 5, 2002).

DARKBLOTCHED ROCKFISH CONSERVATION AREA (DBCA)

The DBCA extends south from the U.S./Canada border (48°30' N. latitude) to 40°10' N. latitude and is bordered by straight-line coordinates on the east (at approximately the 100 fathom depth contour) and on the west (at approximately the 250 fathom depth contour).

The DBCA is closed to limited entry groundfish trawl fishing and fishing with limited entry groundfish trawl gear is prohibited within the DBCA. It is unlawful to take and retain, possess, or land groundfish taken with limited entry groundfish trawl gear in the DBCA. Limited entry groundfish trawl vessels may transit through the DBCA, with or without groundfish on board, provided all groundfish trawl gear is stowed either: (1) below deck; or (2) if the gear cannot readily be moved, in a secured and covered manner, detached from all towing lines, so that it is rendered unusable for fishing.

Trawling shoreward of the DBCA during is permitted October - December and trawling seaward of the DBCA is permitted September - December. Small footrope gear is required shoreward of the DBCA and large footrope gear is permitted seaward of the DBCA.

TRIP LIMITS CHANGES IN THE GROUNDFISH FISHERY

Limited Entry Trawl Fishery in the Area North of 40°10' N. Latitude

Trip limits will change for the following species and/or species groups: minor shelf rockfish, Pacific ocean perch, sablefish, longspine thornyhead, shortspine thornyhead, Dover sole, all other flatfish, petrale sole, rex sole, arrowtooth flounder, minor shelf rockfish, canary rockfish, yellowtail rockfish, and lingcod.

Limited Entry Trawl Fishery in the Area South of 40°10' N. Latitude

Trip limits will change for minor slope rockfish in the area between 40°10' N. latitude and 36° N. latitude and for canary rockfish in the area south of 40°10' N. latitude.

Limited Entry Fixed Gear Fishery and Open Access Fisheries

Pacific whiting will be closed for limited entry fixed gear and open access fisheries.

**Coordinates for the DBCA and an updated set of trip limit tables,
effective September 10, 2002, are included in this notice.**

45	mid-water trawl	CLOSED ^{7/}	During primary whiting season, in trips of at least 10,000 lb of whiting: combined widow and yellowtail limit of 500 lb/ trip, cumulative yellowtail limit of 2,000 lb/ month			CLOSED ^{7/}	
46	small footrope trawl	In landings without flatfish, 1,000 lb/ month. As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder. Combined with and without flatfish, not to exceed 30,000 lb/ 2 months.				CLOSED ^{7/}	As flatfish bycatch, per trip limit is the sum of 33% (by weight) of all flatfish except arrowtooth flounder, plus 10% (by weight) of arrowtooth flounder not to exceed 4,500 lb/ month.
47	Bocaccio - South ^{6/}	600 lb/ 2 months	1,000 lb/ 2 months		CLOSED ^{7/}		
48	Cowcod	CLOSED ^{7/}					
49	Minor nearshore rockfish

	North	800 lb/ 2 months	1,000 lb/ 2 months		500 lb / month		
	South		1,000 lb/ 2 months		CLOSED ^{7/}		
52	Other Fish ^{10/}	Not limited			Grenadier retention	CLOSED ^{7/}	

1/ Trip limits apply coastwide unless otherwise specified. "North" means 40°10' N. lat. to the U.S.-Canada border. "South" means 40°10' N. lat. to the U.S.-Mexico border. 40°10' N. lat. is about 20 nm south of Cape Mendocino, CA.

2/ Gear requirements and prohibitions are explained above. See IV.A.(14).

3/ "Other" flatfish means all flatfish at 50 CFR 660.302 except those in this Table 3 with species specific management measures, including trip limits.

4/ The whiting "per trip" limit in the Eureka area inside 100 fm is 10,000 lb/ trip from January 1 - August 31, 2002. From September 1 - December 31, 2002, the whiting fishery is closed.

5/ Small footrope trawl means a bottom trawl net with a footrope no larger than 8 inches (20 cm) in diameter. In areas where trawl gear is restricted, only one type of trawl gear is allowed on board at any one time. See above.

6/ Yellowtail rockfish in the south and bocaccio and chilipepper rockfishes in the north are included in the trip limits for minor shelf rockfish in the appropriate area. POP in the south and splitnose rockfish in the north are included in the trip limits for minor slope rockfish in the appropriate area.

7/ Closed means that it is prohibited to take and retain, possess, or land the designated species in the time or area indicated. See IV.A.(7).

8/ The minimum size limit for lingcod is 24 inches (61 cm) total length.

9/ The minimum size requirement for sablefish is 22 inches (56 cm) total length. No more than 500 lb of undersized sablefish may be landed per trip.

10/ Other fish are defined at 50 CFR 660.302, as those groundfish species or species groups for which there is no trip limit, size limit, quota, or harvest guideline.

11/ All trawling is prohibited within the DBCA ; gear must be covered and stowed when transiting through the area. See IV.A.(22).

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.
